WhyPRECISCA?

At PrecisCa, we're dedicated to advancing oncology by creating a platform that fosters collaboration, education, and innovation. Our mission is to elevate cancer care through unique opportunities that connect emerging leaders, seasoned professionals, and key opinion leaders (KOLs) in the field.

UNMATCHED EXPERTISE AND INNOVATION

PrecisCa stands at the forefront of oncology education and research, thanks to our deep connections with leading academic institutions and healthcare organizations. Our PrecisCa Oncology Video Library, created in collaboration with our Distinguished Faculty & Oncology Fellows, features over 1,700 videos that serve as a rich resource for continuous learning and professional development. This library is a testament to our commitment to providing cutting-edge content that supports the ongoing education of oncology professionals.

STRONG ACADEMIC AND INDUSTRY CONNECTIONS

Our partnerships with Academic Program Administrators across the United States ensure that we are deeply embedded within the educational fabric of the oncology community. These relationships allow us to create programs and events that are not only relevant but also impactful. By working closely with both academia and industry, we bridge the gap between research and clinical practice, fostering a collaborative environment that accelerates advancements in cancer treatment and care.

COMMITMENT TO EMERGING LEADERS

PrecisCa is dedicated to nurturing the next generation of oncology leaders. Our programs are designed to provide fellows with the tools, knowledge, and connections they need to excel in their careers. By sponsoring PrecisCa events, organizations can directly support the development of these emerging leaders, ensuring a brighter future for cancer treatment and research. Our focus on professional development and mentorship helps cultivate a community of well-prepared, highly skilled oncology professionals.

EXCLUSIVE NETWORKING OPPORTUNITIES

One of the core values at PrecisCa is the importance of networking and mentorship. Recognizing the lack of national platforms for oncology fellows to connect and learn from each other post-COVID, we launched the 1st National In-Person Oncology Fellows and KOL Forum in April 2023. Since then, our events have expanded to include virtual disease state webinars and additional annual conferences, drawing hundreds of attendees and further enhancing the network of oncology professionals.

Healthcare Unfiltered is a raw, honest, and timely podcast created and hosted by Chadi Nabhan, MD, MBA. This weekly show airs every Tuesday and tackles and debates all aspects of healthcare from recent advances to policy issues, leadership, mentorship and other timely topics. Chadi, an award winning hematologist/oncologist and innovative Executive, invites Expert stakeholders in medicine and oncology in particular, and never shies away from the most contentious topics in oncology today.

Partnering with PrecisCa means supporting a mission-driven organization that is dedicated to advancing oncology through education, collaboration, and innovation. Join us in our quest to elevate cancer care and make a meaningful impact in the fight against cancer. Together, we can create a future where cancer is better understood, treated, and ultimately, cured.
